A smooth move for G2 Legal | Bullhorn implementation with Automation & Analytics

Migration from JobAdder

Bespoke configuration with custom fields

Training & post go-live care

Looking to cleanse their database and drive automation, G2 Legal committed to migrating to Bullhorn to streamline operations and equip their team with the tools needed for recruitment success.

To ensure a seamless implementation,
they partnered with Kyloe for expert support throughout the project.

"Kyloe came highly recommended as a partner to help us through our project from start to finish - and most importantly for us, post go live!"

Stephen Chantry, Director | G2 Legal

How did Kyloe help you?

"Kyloe helped and supported us from the very first kick off call through to our post go live calls, for the ATS, Analytics and Automations. And were on hand for any questions, issues and customisations we needed to make the transition as seamless as possible."

How did the project go?

"We feel like the project wouldn't have been anywhere near as smooth if we hadn't had the input and advice from all the team at Kyloe."

Would you recommend Kyloe Partners?

"If you're looking for a Bullhorn expert who can provide clear, concise advice on data migration from another CRM, look no further than Kyloe. I'll certainly be recommending them in the future."

Stephen Chantry, Director | G2 Legal

How has it impacted your business?

"The ease of transition helped us to maintain business continuity and sales throughout the migration period. We don't feel this would have been possible had we managed everything in-house."

" *"We will definitely keep Kyloe front of mind for any future customisations and projects we have within our CRM and tech stack."* **"**
